The conference star

With the Olympus DM-20 conference kit every meeting makes its mark. Not only does the DM-20 offer the quality and features you would expect from an Olympus digital voice recorder, equipped with two microphones, the DM-20 also allows stereo recordings of an entire conference room. The optional ME50S plug-in stereo microphone permits stereo recording of smaller venues, making it ideal for interviews. On top of that, you can use the DM-20 to play music files. Perfect for unwinding after a long, hard day or when taking a break during long meetings.

Sound on!

For your voice recordings the DM-20 provides

- 4 recording qualities (SHQ/HQ in WMA and SP/LP in DSS)

- 4 hours SHQ stereo recording capacity with AKG conference microphone or ME50S stereo microphone

- a maximum recording time of 44 hours and 45 minutes

- high-compression file formats (DSS/WMA)

- 5 files with up to 199 files each

Music, maestro!

Enjoy the DM-20's high-quality, integrated music player between meetings and relax to your favourite songs using either the stereo earphones supplied or the integrated loudspeaker. The first-class sound quality of the unrivalled music player makes every break a pleasure. For perfect music enjoyment the DM-20 provides

- music files in MP3 or WMA format for excellent quality in high-compression file formats

- 3D sound quality thanks to WOW technology

- equaliser, repeat and random play

- approx. 120 minutes of music on 128 MB at 128 kbit/s

Original size

No more Double Dutch

To make sure the secretary can keep a cool head while typing, the AS-3000 transcription kit offers four different listening modes: stereo or mono as well as left and right. This means that individual voices speaking simultaneously can be heard separately, bringing an end to confusion.

DM-20

Conferencing and interviewing

Two AKG microphones each with a 2.5 m cable are the ideal solution for recording a conference and even allow stereo recordings in larger conference rooms. This is ensured by two high-quality electret condenser microphones which capture every sound and statement in the room thanks to their omnidirectional directivity. Naturally, the frequency response of the DM-20 and the microphones (up to 8,000 Hz) is perfectly attuned, guaranteeing excellent playback quality.

The plug-in ME50S stereo microphone is also available, enabling the user to make professional recordings of interviews, for example.

Making full use of the performance potential

Maximise the potential of the professional digital product line from Olympus with the extensive range of system accessories.

Voice files can be transferred quickly and simply to a PC or laptop, e.g. using the USB cable or the various SmartMedia card adapters.

Olympus also provides software plus an interface for voice recognition, guaranteeing smooth workflow.

Many of the optional accessories can also be used for Olympus digital cameras!

AC adapter: A322

Power adapter for extended use
with 3 V (300mA) mains voltage
(for Europe, except the United Kingdom)

Ni-MH battery charger: BC 400

Quick charger including 4 AAA Ni-MH batteries.
Charging time for 2 AA batteries approx.
105 minutes. Simultaneous charging of
AAA and AA batteries possible.

Rechargeable Ni-MH batteries: BR 401

Highly efficient, long-life rechargeable batteries.

Noise cancelling microphone: ME 12

Reduces ambient noise and improves
transcription accuracy when using voice
recognition software.

Tie-clip microphone: ME-10

For recording your own voice or other people
nearby. Can be attached to clothing by a clip.
The PA3 adapter required is included.
Connecting cable: KA 232

Connects the microphone socket to the other
devices, e.g. a radio. An additional PA3 adapter
is required here.

Plug adapter: PA3

Allows the connection of microphones
with 2.5 mm mini-plug to equipment with
3.5 mm mini-sockets.

DS-3000

3V (3.3 V) SmartMedia cards:

Compact, replaceable memory cards,
available as 16, 32, 64 and 128 MB.

SmartMedia case:

Flat, compact leather case for
8 SmartMedia cards.

PC card adapter:

Provides data transfer from a SmartMedia
card to a PC fitted with a PC card (PCMCIA)
interface.

FlashPath adapter:

Allows data transfer from SmartMedia cards to
a computer fitted with a 3.5" floppy disk drive.
Supports Windows 98/ME/2000/XP and
Macintosh OS 8.6/9x/X.

Reader/writer: MAUSB

Allows fast and simple data transfer via USB
interface between SmartMedia cards and
computers with Windows (Windows 9.8/Me/
2000/XP) and Macintosh (OS 8.6/ 9x./ X)
operating systems.

DM-20

Stereo microphone ME-50S:

Small plug-in microphone for making stereo
recordings in WMA format in high-quality
SHQ mode.
