

Digital Conference Recording Set

Turn your PC into a conference recording system.

The Philips Digital Conference Recording Set

is a compact, easy-to-use solution for all your conference recording needs. This state-of-the-art system turns your PC/laptop into a fully-fledged conference recording system. In addition, its digital recording format makes it ideal for professional digital transcription. Installed in minutes, the system reliably and accurately records conferences with up to 36 participants, and allows for continuous recording irrespective of conference length. Not only can you be 100% certain that the proceedings of important meetings have been accurately taken down, cutting-edge technology also means that minutes can be transcribed immediately after the conference. You can even archive the sound files for later reference, giving you total peace of mind.

The practical briefcase adds an element of mobility to your minute-taking and contains everything you need.

Benefits at a glance:

Mobile & convenient: complete system; record anywhere, any time

Reliable & efficient: catches every word; small sound files

Quick & easy: easy to install and use; minutes ready promptly

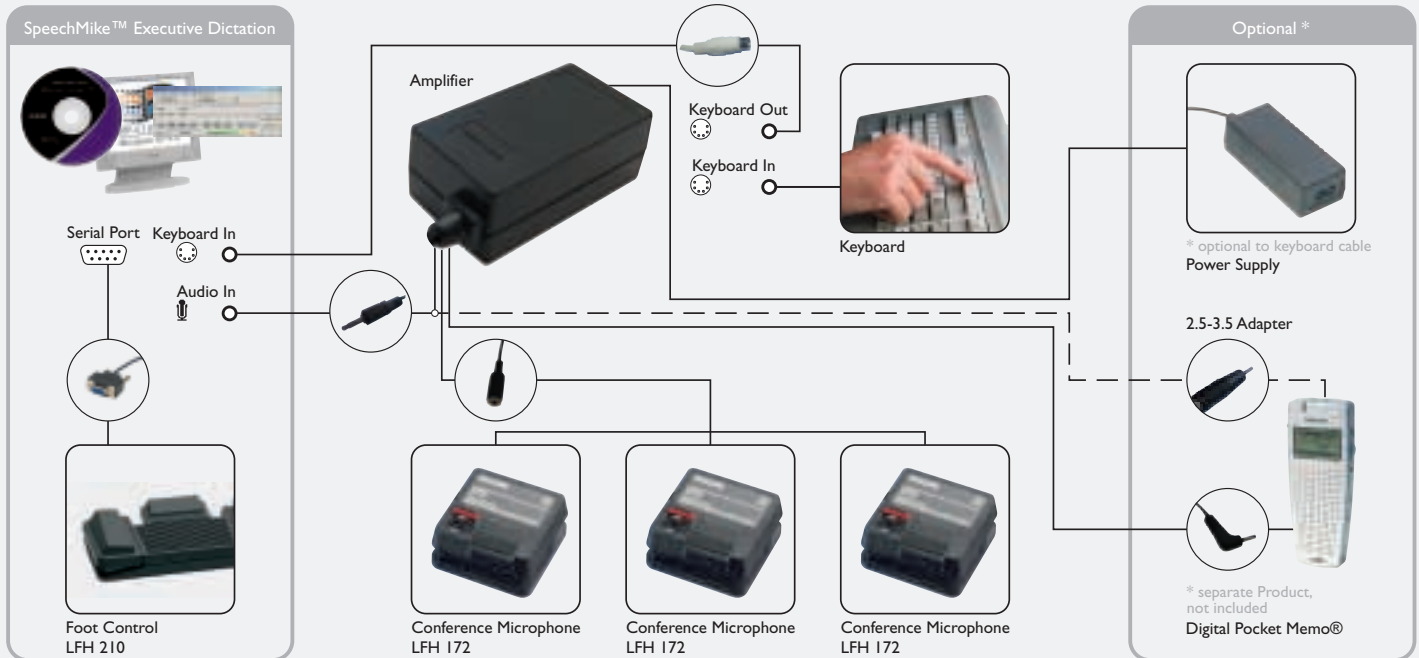

Flexible & practical: hands-free dictation option; mobile recording via the Philips Digital Pocket Memo®

When every word counts, you can count on the Philips Digital Conference Recording Set!
