

# NUANCE

The experience speaks for itself™

## DATASHEET

### Dragon NaturallySpeaking® 10 Professional

#### Work Faster and Smarter

Dragon® NaturallySpeaking® 10 Professional is the ideal solution for busy corporate professionals – such as those in the

government, insurance and education industries – to create documents and emails, fill out forms and streamline workflow tasks – all by speaking.

Turn voice into text more than three times faster than most people type, with up to 99% accuracy. Dragon NaturallySpeaking 10 Professional offers seamless compatibility with Microsoft Office and users can dictate, edit and navigate menus in virtually any Windows-based application.

#### Create and edit documents and spreadsheets

With Dragon NaturallySpeaking 10 Professional, you can easily create documents and spreadsheets, or edit existing ones, simply by speaking. Quickly add custom words tuned to the lexicon of your specific industry. Plus, Dragon enables easy correction and proofing: with the “play back” feature, you can listen to your dictation while Dragon highlights the corresponding text on the screen for easy proofreading.

**NEW** • Quick Voice Formatting commands allow you to issue a single voice command, such as “Bold Quick Voice Formatting”, to make formatting and deleting text faster than ever. In addition, the extensive set of Natural Language Commands mean you don't have to memorise complex instructions. In Microsoft Word, for example, you can say “make that bigger” and the font size increases instantly.

**NEW** • Dragon 10 introduces new graphical icons to enhance the DragonBar user interface, making the product even easier to use!

#### Supports UK English spelling

#### Automate complex, repetitive tasks with voice commands

Dragon NaturallySpeaking 10 Professional supports sophisticated macros to automate document-intensive business tasks and dramatically improve productivity. A single command can insert text and graphics into a document, such as an email signature or boilerplate text. In fact, custom voice commands can be created to automate virtually any repetitive task involving multiple keystrokes or mouse clicks.

#### Dragon voice shortcuts perform tasks faster than ever

**NEW** • With Dragon Voice Shortcuts for Email and Calendar, say, “Send email to Jon Smith and Raphael Sanchez” and Dragon will activate your email program, create a new email and put the appropriate contact names into the “to:” box. Or to schedule a meeting, say “Schedule meeting with Jon Smith and Raphael Sanchez” and Dragon jumpstarts the process by opening a new calendar entry in Outlook and adding the selected contact(s).

## ENTERPRISE BENEFITS

### Streamline Complex or Repetitive Document-Creation Tasks

Create custom voice commands to automate and streamline repetitive tasks that employees perform dozens of times a day. Dragon NaturallySpeaking 10 Professional allows organisations to set up macros of frequently-used signatures, boilerplates, phrases, paragraphs and more, so that multi-step processes can be automatically executed with a single voice command – saving even more time.

### Employees Can Work Hands-Free

Use Dragon NaturallySpeaking with Nuance-approved Bluetooth headsets (not included). Convenient to use with a Tablet PC system.

### Provide Accessibility for Disabled Workers and Protect Employees from Repetitive Strain Injuries

Dragon NaturallySpeaking 10 Professional can help organisations meet their disability management needs. Whether employees are permanently disabled or just in temporary rehabilitation, Dragon can keep everyone on the job. Use voice to control the PC and create documents, reducing the risk of developing repetitive strain injuries, such as carpal tunnel syndrome.

### Boost Employee Productivity

You can speak more than three times faster than you can type. Dragon NaturallySpeaking 10 installs quickly and requires no special script reading. New on-screen help and tutorials enable employees to become expert users in no time.

**NEW** • Dragon Voice Shortcuts for Web and Desktop Search make it faster and easier than ever to find and access information. Say a command containing your desired search words, such as “Search the Web for financial management resources,” or “Search maps for Italian restaurants in Central London” and Dragon 10 will use the default search engine and Web browser to enter your dictated term(s) in the search field and return the results. You may also search specific sites including Google, Yahoo, eBay, Wikipedia, YouTube and more. Search your computer as directly as the Web, by dictating the word(s) to find in documents, emails and Web-browsing history.

## Designed for enterprise deployments

Dragon NaturallySpeaking 10 Professional offers complete enterprise network support, including new security features, a special management guide for IT professionals and support for Citrix deployments. Dragon NaturallySpeaking 10 Professional is ideal for:

- Field reporting (insurance claims, field sales, field service, social workers, inspectors, law enforcement)
- Intelligence reporting and incident reporting (law enforcement)
- Repetitive strain injury (RSI) prevention/accommodation
- Accessibility (physical or language-based learning disabilities such as dyslexia)
- Call centre agents
- General office productivity.

Organisations with large deployments can centrally manage voice profiles, custom vocabularies and multiple installations. Support for Citrix thin-client environments means that Dragon NaturallySpeaking 10 Professional can be deployed on a Citrix server, so that dictation can be available from Citrix thin clients throughout the organisation.

## Dictate into a handheld recorder for later transcription

Be productive on the move. When away from the office, dictate into any Nuance-certified digital recorder for automatic transcription when synched with a PC.

## SYSTEM REQUIREMENTS

- CPU: Intel® Pentium® / 1 GHz processor or equivalent AMD processor. Faster processors will yield faster performance. Memory: 512 MB RAM (1 GB RAM for Windows Vista™)
- Free hard disk space: 2 GB
- L2 Cache: 512 KB
- Supported Operating Systems: Windows Server 2000, Windows Server 2003, Windows XP SP2 or higher - 32 bit, Windows 2000 SP4 or higher, Windows Vista™ or Windows Vista™ SP1, 32-bit
- DVD-ROM drive (required for installation)
- Microsoft® Internet Explorer 6 or higher (free download available at [www.microsoft.com](http://www.microsoft.com))
- Nuance-approved noise-cancelling headset microphone (included)
- Creative® Labs Sound Blaster® 16 or equivalent sound card supporting 16-bit recording
- Speakers (required for playback of recorded speech and text-to-speech features)
- For Bluetooth wireless microphone support, please visit <http://support.nuance.com/compatibility/>
- A Web connection is required for activation.

During the install process, the software checks to make sure your system meets these minimum requirements. If your system does not meet the requirements, the software will not be installed.

## RECOMMENDED SPECIFICATIONS

- CPU: Intel® Pentium® / 2.4 GHz processor (1.6 GHz dual core processor) or equivalent AMD processor
- Memory: 1 GB RAM
- L2 Cache: 1 MB

This edition of Dragon does not support dictation directly into Electronic Medical Record (EMR) Systems. For EMR support, please use Dragon Medical Edition.

Dragon NaturallySpeaking has won over 175 awards worldwide.
